Completed on	Tuesday, 25 August 2026, 8:46 AM
Time taken	8 mins 14 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

```c
#include<stdio.h>
int Factor(int num){
    int counter=0;
    int i;
    for(i = 1;i<=num;++i){
        counter=counter+1;
    if(num % i==0){
        counter=counter+1;
    }
    counter=counter+1;

    }
    counter=counter+1;
    return counter;
}
int main(){
    int n;
    scanf("%d",&n);
    printf("%d",Factor(n));
}
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔
✔	4	12	12	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
